

ICASSP 2021 Show-and-Tell Demos Call for Proposals

The ICASSP 2021 organization committee is soliciting proposals for a Show-and-Tell Demos event that will be held during the conference. The Show-and-Tell Demos event includes demonstrations of innovations done by research and engineering groups in industry, academia, and governmental institutes. The demonstrations can be related to any of the technical areas as defined in the [Call for Papers](#) of ICASSP 2021. The theme of the conference this year is *Extracting Knowledge From Information*.

The deadline for submission of a Show-and-Tell Demos proposal is **March 15, 2021**, and the accepted proposals will be announced by **March 27, 2021**. A proposal of no more than 300 words should be submitted online by including the following information:

1. Title and topic of the proposal;
2. Authors and affiliations;
3. Detailed description of the demo;
4. Main novelty and innovations of the demo;
5. Impact to signal processing communities;

The proposal must clearly explain in what sense the proposed demonstration is novel and innovative, and how it will appeal to the ICASSP audience. Show-and-Tell demonstrations should have an interactive component, which goes beyond demonstrating “simple” simulated graphs on a computer. Commercial product demonstrations are considered more appropriate for ICASSP exhibitions and will not be considered for Show-and-Tell Demos.

The demonstrations will be conducted virtually using Zoom and Gather (for interactions). Please note that you will need to register at ICASSP 2021 in order to present a demonstration.

Important Dates

- Proposal submission deadline: March 15, 2021
- Notification of acceptance: March 27, 2021
